DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-23 and 25, drawn to an RNA polymerase mutant modified to enhance its ability to incorporate 3'-deoxyribonucleotides and a method for its production.

Group II, claim(s) 24, drawn to a polynucleotide encoding the RNA polymerase mutant modified to enhance its ability to incorporate 3'-deoxyribonucleotides.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Hayashizaki Yoshihide (JP 11075898 A) teach a variant RNA polymerase modified so as to improve the ability to incorporate 3'-dNTP and therefore the groups do not share a special technical feature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1652

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
